Dear Mr. Kepaptsoglou:

Congratulations! You and Matthew Karlaftis, Ph.D., M.ASCE have been selected by the Society Awards Committee to receive the 2011 ASCE State-of-the-Art of Civil Engineering Award. The award citation will read: *"For the paper, "Transit Route Network Design Problem: Review," Journal of Transportation Engineering, August 2009."* In selecting your paper for this award, the committee particularly noted its scholarly review of the chosen topic.

We hope that you can personally accept this award, which consists of a plaque during the Leadership Luncheon at the Society's Annual Conference, October 20 -22, 2011 in Memphis, TN. You can expect to hear from Jane Moran Alspach, Senior Manager of Honors and Awards, in July with respect to presentation of your award.

Please direct your attention to the important enclosures. As you will see, we ask your assistance as we prepare publicity about your award. The attachments will guide you through the process of assembling requested documents and making your travel plans.

Please accept my personal congratulations on this important milestone in your career.

Sincerely,

Patrick J. Natale, P.E., F.ASCE  
Executive Director
